

Spring core :

Annotations.

Stereotype annotation:

@Component

@Service

@Repository

@Controller

---component auto-scanning

Note: If our Spring Bean is in prototype scope then, Spring container will not manage the life-cycle of Spring bean after giving the object to the client. i.e destroy method will not be called on Spring Bean obj in prototype scope.

@Bean

--to register a normal java class with container to make a Spring Bean

1. by using <bean> tag

2.by using stereotype annotation

3. by using @Bean tag
